ODT QUESTIONS	Y	N	ID	RATIONALE
Can I distinguish a non-trivial structure within the observed people?	x		1	all the evidence available (starting from REF 3) points out to a non-trivial structure in which the professionals within NOKIA and MeeGo are organized.
Do community members share a situated practice?		x	2	since in page 68 of REF 2, the author stresses that some people worked off-site on the same product. This is repeated multiple times in other parts of the deliverable.
Do all community members exhibit a different location?	x		3	since in page 68 REF 2's statements suggest that a technology for localization and involvement of people from off-site workers was needed.
Do community members use informal communication only? - There is a strong set of ties between the whole network and its members - Organizational sponsor interferes only minimally. - ...		x	4	some selection and governance protocols are still in action to request additional people to work on certain tasks (page 84 of REF 2 + AGILE SLIDES)
Do community members exhibit longevity bound to a project?	x		5	since in page 2 of AGILE SLIDES the strategic portfolio duration is fixed to increments of 2-5 years.
Do community members actively try to increase visibility of their operations and results?		x	6	REF 1 in page 59 states that all items and backlogs and all operations are explicitly planned to be visible and transparent. Therefore visibility is actively pursued NOT by members but by hand of their organizational sponsor.
Do community members actively pursue cohesion?	x		7	In page 30 and 65, REF 1 notes that anywhere in the organizational structure, the intervention of senior management is needed to provide attention for quality, value and encouragement/bonding. These are consistent with increasing the cohesion of the Scrum team.
Are community members expected to demonstrate ROI to business sponsors?	x		8	since in page 64 and subsequent, REF 2 states that demos were acting as checkpoints for customers to evaluate ROI.
Does the community effectiveness depend on people' engagement?		x	9	since in page 74, REF 2 reports that an interviewee has had a reduced engagement in the project, caused by a reduced set of roles and responsibilities. This however, did not reduce productivity (page 64 and following).
Do community members actively accumulate and foster organisational culture?		x	10	there is no indication of harvesting and management of organizational culture (e.g. best-practices).
Do community members require formal status evaluation?		x	11	We are using a closed-world assumption, therefore the answer is NO (Threat to validity? motivate the closed world assumption).
Do community members tackle one explicit organisational problem?	x		12	since in page 24 of REF 1 there is a clear-cut definition of the mission/problem statement. This constrains the operativeness of the community to achieving the described directives.
Do community members endure formal governance practices?		x	13	since REF 1 states in page 30 and subsequent that teams are self-managing, self-organizing, cross-functional and responsible. This means that there are no fixed and formally agreed governance guidelines that arrange and constrain the work of teams.
